**BIHLER**  
Technology

Thinkers have long lauded the boundless nature of **{imagination}** and lamented the fact that it is limited by reality.

That has changed.

SUPERB brings its customers Manufacturing Solutions backed by Bihler Manufacturing Technology that is limited only by **{imagination}**.

Bihler is a Manufacturing Automation Platform that truly combines the two disciplines—manufacturing components and automating their assembly to efficiently convert multiple raw materials into finished sub-assemblies in one automated process. Process time is optimized, inventories reduced, quality assured, and real savings achieved. Thousands of metal and plastic engineered components find their optimum path into existence through one solution—Bihler Technology.

Bihler Technology stretches the limits of **{imagination}** and makes the impossible possible on the frontiers of the Factory of the Future. When technology stretches the limits of

**{imagination}** it also challenges the more basic elements of manufacturing execution—the **{planning}** and **{doing}**.

SUPERB invites you to **{imagine}** what might be possible and we will execute those possibilities into reality with Bihler Technology and the disciplines of **{planning}** and **{doing}** to deliver to you, the customer, SUPERB manufacturing solutions on time every time.

**{imaginatively}** yours,

John Miller  
*Founder & President*  
SUPERB Industries, Inc.

# { PLAN }

## strategic {alliances}

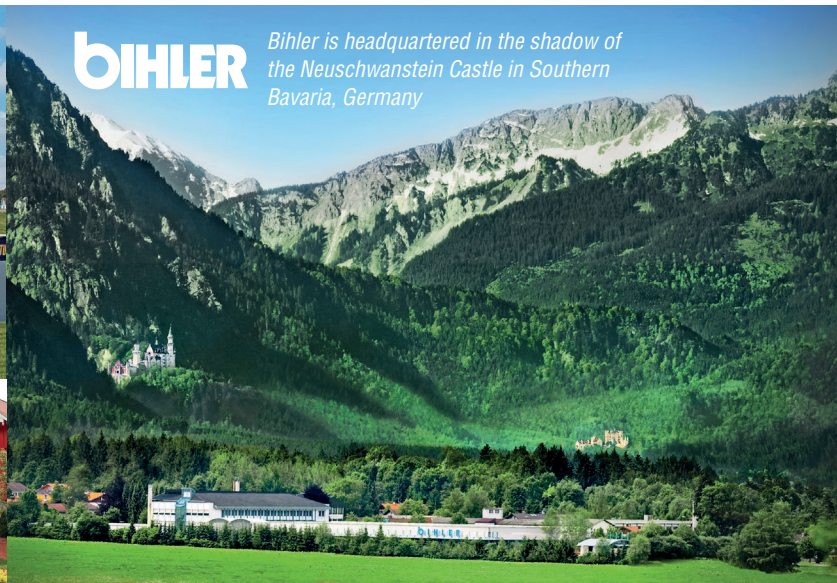

Manufacturing Technology that stretches **{imagination}** requires **{planning}** that extends beyond conventional **{strategy}**, **{systems}**, and **{support}**.

Our customer **{support}** begins when **{imagination}** is birthed and continues for perpetuity during design, PPAP and production from central and global locations.

We understand that minutes count, that plans flex, and that production must by all and any means continue.

*"Made in Germany"  
Quality in The Little  
Switzerland of Ohio.*

## management {systems}

Our **{strategy}** includes an **{alliance}** with the originator of the technology—Bihler. Our **{systems}** go beyond the conventional certifications to the holistic discipline of SUPERB9000.

# global {support}

SUPERB's support team solves technical problems faster and better.

Reaction time in the global manufacturing arena is not measured in months, weeks, or days, but in hours and minutes.

SUPERB comes to you, with a team of qualified first responders located in a technical center near you.

Asia

**{doing}** is where manufacturing technology becomes the highway upon which **{imagination}** and **{planning}** find traction.

Bihler Technology is an autobahn upon which manufacturing production travels at high rates of speed, flexibility and efficiency.

In 2018 over 1.2 billion manufactured components traveled down SUPERB's manufacturing autobahn to destinations around the world.

The Good News: There is no traffic jam on our autobahn. We have open capacity.

it's in the

**{DOING}**

Challenge us with your **{imagination}**. SUPERB will **{plan}** and **{do}** a manufacturing solution for you that takes you to your destination with confidence.
